

Revised - July 25, 2008

Anti-virus - AVG

ERAC has a revised agreement which provides ERAC members with AVG anti-virus and spyware solutions. This arrangement offers the same discount pricing for the new version of Grisoft AVG software product.

Summary

ERAC thru Altair Electronics Ltd has an agreement to provide a mix of AVG solutions addressing various anti-virus, spyware and malware solution requirements. These solutions provide licensing, maintenance renewals and support for a two year period. The offer is available through to June 30, 2009. This pricing is confidential and not to be disclosed.

Timelines

July 11, 2007 – June 30, 2009

Pricing

CONFIDENTIAL PRICING

Pricing is confidential for ERAC members only. Please login or see your District Software Contact or Purchasing Manager for pricing.

Details

These AVG products provide for no differentiation between servers and workstations and are Microsoft Vista compatible. A central administration tool is included at no extra cost. AVG is West Coast Labs, ICSA, VB and TUV certified and awarded Best Security Software 2007 from Techworld: http://www.event-space.com/techworld2007/winners2007.asp?m_pid=0&m_nid=20945. Altair Electronics will provide front-line support and refer other questions thru their re-seller support network as required. Below is an outline with active links and website addresses giving detailed descriptions of the products and their specific features and functions:

AVG Email Server Enterprise Edition

<http://www.grisoft.com/ca-en.product-avg-email-server-edition>

- Security protection against viruses, worms, trojans, spyware and adware for e-mail servers. Anti-spyware technology detects spyware, adware, DLL-trojans, keyloggers, malware hidden in data streams, archives, Windows registry and more. Every e-mail and attachment sent or received through the mail server is checked, providing full protection from e-mail-borne threats. E-mail Server supports all leading mail server applications, including MS Exchange, Lotus, Kerio MailServer, and Lan Suite ([see detailed platform list](#)).
- The AVG Resident Shield provides maximum protection for all server activity by scanning every file opened, executed, or saved on the mail server. It also prevents the opening or executing of infected files, so that not only e-mail but also the mail server itself is fully protected against viruses and malware. Automatic threat handling can automatically heal or remove infected files and other

threats such as trojans, worms and spyware. [AVG Admin - Remote Administration](#) allows you to easily install and manage AVG remotely (all features except additional plug-ins).

AVG Anti-Virus Network Edition

<http://www.grisoft.com/ca-en.product-avg-anti-virus-network-edition>

- Antivirus and antispyware protection providing easy to use and manage installation and configuration for workstations and servers. The combination of AVG's new intelligent real-time scanner, comprehensive web shield and high-speed automatic updates ensures data is protected against viruses, spyware, adware and hackers. Key technologies include:
 - Anti-Virus; protection against viruses, worms and trojans
 - Anti-Spyware; protection against spyware, adware and identity-theft
 - Anti-Rootkit; protection against hidden threats (rootkits)
 - Web Shield & LinkScanner; protection against malicious websites
 - Firewall; protection against hackers
- Central management and monitoring ensures that ongoing administration is kept simple:
 - Remote installation and repair
 - License Management
 - Centralized configuration, reporting and updating
 - Enforcement of security policies

<http://www.grisoft.com/ca-en.product-avg-admin> allows you to easily install and manage AVG remotely (all features except additional plug-ins).

Standard software warranty provisions apply to these options. For further information about this ERAC offer, contact Altair Electronics (contact information appears below) or ERAC's Ian Mulcaster at 604-713-5598 or imulcaster@bcerac.ca

Ordering Info
