

Source Type Search

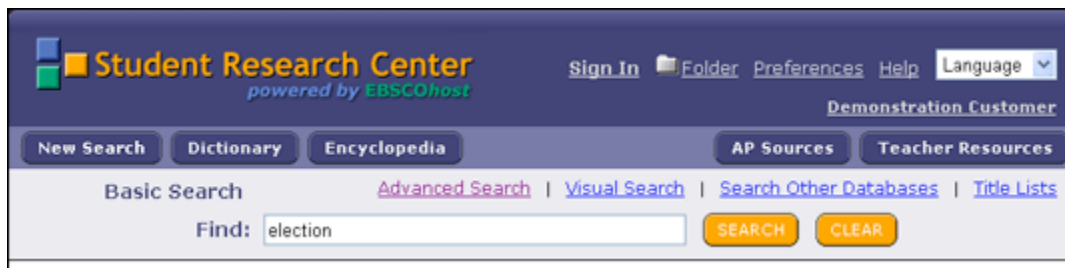

You can search within a specific source type. For example, you may want to limit your search terms to only results found only in Magazines, or only Newspapers.

To search by a specific source type:

1. From the Basic Search Screen, click a **source type** (for example, *Newspapers*) button. The search screen for the appropriate source type will display.

2. In the **Find** field, enter your search terms, and select any limiters or expanders available on the screen.

3. Click **Search**. A Result List displays. Only results with the source type you selected appear.
